Art work name: Stephen Hawking

Author: Krunomir Dvorski

Year: 2010.

Description: Portrait of a legendary person

Technic: Pencil drawing

Dimensions: 216 × 279 mm

Stephen Hawking

Stephen Hawking is the most popular living physicist. He is a remarkable leader, teacher, writer and entertainer. Man of crazy ideas, which is brave enough to criticize Einstein. I have experienced him as a man who built his own kingdom on his own weaknesses. It's fantastic and promising for everyone. He is a magical black hole that radiates confidence and optimism. His presence opens up new avenues almost forgotten philosophy. Physics is fun with him.

Gallery Krunomir

The gallery provides information and pictures of Krunomir's art. In cultural circles Krunomir is known as a hobby artist.
